Subject: Topic for today's meeting

Hi Kristine –

Here's a list of topics we'd like to address today. We would like to focus on the global issues/concerns we have regarding EPA's Section 5 comments and also get some clarifications. If time permits, we can get into specific items in Sections 5.0 through 5.3 (Mobile Sediments). But we'd like to hold off on discussing specific items in Section 5.4 (Surface Water), Section 5.5 (TZW), and Section 5.6 (Biota) until next week.

See you at noon. Thanks, Gene

Global Section 5 Discussion Topics

1. Consistency of COC/terminology list with other RI/FS reports
2. Section 5 versus Section 10 content
 - a. nature discussions
 - b. source statements
3. Removal of Sampling Effort Summaries
4. Project-specific "T", "A" and "V" descriptors in Tables, Maps and Figures.
5. Use the term "Key" contaminants
6. Data Adequacy and Data Quality Statements
7. Technical discrepancies (e.g., sample counts)

Subsection Specific General Issues

Section 5.2 Bedded Sediment - There is no callout for the revised Box-Whisker plots developed at EPA's request. Are these being presented in Section 5?

Section 5.3 Mobile Sediment - Borrow pit data set summary is not included.

Section 5.4 Surface Water - WQC/MCL comparisons; histogram format

Section 5.5 TZW - Sample count discrepancies

Section 5.6 Biota - tissue composition scheme, sampling zones
